Dimple Khattar

dimplekhattar@uchicago.edu | +1 (773)-870-8447 | LinkedIn | GitHub

EDUCATION

Harris School of Public Policy, University of Chicago — Illinois, USA
Master's in Public Policy — 2025–2027
Relevant Coursework: Grid Financing, Utility and Electricity Markets: Regulation in US, Energy Policy and Human Behaviour, Impact Investing, Microecon- I & II, Stats- I & II, AP- I & II

Indian Institute of Technology, Gandhinagar — Gujarat, India
MA in Society & Culture, specialization in Human Development & Public Policy — 2018–2020

Kirori Mal College, University of Delhi — New Delhi, India
BA (Hons) English — 2015–2018

PROFESSIONAL EXPERIENCE

Data Science Institute, University of Chicago — Chicago, USA
Summer Intern — Jun 2026 – Sept 2026

- Modeled the relationship between extreme heat exposure and excess mortality during the 2021 Pacific Northwest heat dome to temperature-bin mortality data across California, Idaho, Oregon, and Washington
- Built a Python pipeline to merge and clean multi-source Global Burden of Disease mortality estimates, GADM administrative boundaries, and ERA5 climate data, producing a reproducible empirical framework for climate-health research
- Estimated differences in mortality between physics-based and AI-based weather forecasting models by translating forecast errors into temperature-mortality impacts

Becker Friedman Institute for Economics, University of Chicago — Chicago, USA
Research Assistant, Part time — Jul 2025 – Jun 2026

- Modeled provider antibiotic-dispensing behavior in Kenya using logit regression, testing interaction effects between provider characteristics and antimicrobial-resistance knowledge
- Data harmonisation for (10 years) time series data records for daily wage laborers in Pakistan, drafted code files for quality checks, dummy variable, and prepared the final dataset
- Drafted high-frequency data-quality checks (Stata do-files) for a multi-module household survey in Pakistan, performing data cleaning, consistency checks, and documentation to ensure analysis-ready data

J-PAL South Asia — Multiple locations, India
Senior Research Associate — Apr 2022 – Aug 2025

- Presented the Telangana state government a strategic plan to reduce carbon emissions in paddy production and feasibility plan to rollout Alternate Wetting and Drying among small scale farmers in the state
- Presented the Punjab state government on groundwater-to-surface-water transition intervention, briefed about field-based feasibility, and delivered a written policy memo that informed government decision-making
- Analysed farmers' adoption behavior across two studies: mechanization in Indian agriculture (modeled uptake of machines with risk aversion, time-vs-money preferences) and cold-storage rollout amongst Odisha farmers (modeled harvest selling price with adoption barriers, savings from reduced distress selling, quantity of perishable harvest)
- Built a Stata pipeline to accommodate daily incoming data to run quality assurance checks and flagging any data quality concerns including duplicates, compliance, variance, and attrition rate
- Managed a project budget of up to $600K across workstreams, making real-time reallocations and preparing budget and deliverable reports for funders

Grassroots Research & Advocacy Movement (GRAAM) — New Delhi, India
Research Associate — Jan 2021 – Mar 2022

- Built a performance-measurement framework for grassroots health service delivery in Gujarat using logit models on Python-cleaned data to guide state health officials' policy prioritization

LEADERSHIP & INVOLVEMENT

- Awarded Merit Scholarship to pursue Master's in Public Policy at Harris School of Public Policy, University of Chicago
- Fellowship: Awarded $8,250 for Bartlett Fellowship by Energy Policy Institute, University of Chicago
- Fellowship: Clean Energy Leadership Institute (CELI); focus on clean energy and cross-sector energy networks
- Senior Associate, J-PAL South Asia: Mentored 5 Associates from varied academic and professional backgrounds on project execution and technical skill-building; coordinated logistics and vendor relations for large-scale data collection

SKILLS

- Data & Analysis: Stata, Python, R, Excel, QGIS
- Visualization & Communication: Tableau, Power BI, Smartsheets, PowerPoint, R (ggplot2), LaTeX
