EDUCATION

Harris School of Public Policy, University of Chicago

Illinois, USA

Master's in Public Policy

2025–(Anticipated 2027)

Relevant Coursework: Utility & Electricity Markets, Grid Financing, Impact Investing, Microeconomics, Statistics

Proud Project: Built optimal power-procurement strategy for two 100-MW AI data centers on ERCOT; modeled LMPs, spark spreads, and BESS valuation via least-squares Monte Carlo to produce a full revenue model

Indian Institute of Technology, Gandhinagar

Gujarat, India

MA in Society & Culture, specialization in Human Development & Public Policy

2018–2020

Kirori Mal College, University of Delhi

New Delhi, India

BA (Hons) English

2015–2018

PROFESSIONAL EXPERIENCE

Cook County Bureau of Economic Development

Chicago, USA

Summer Intern

Jun 2026 – July 2026

- **Designing** a records retention schedule for county government by mapping 180+ GB of departmental data to 17 functional record series, coordinating input from senior stakeholders across Finance, Communications, and Policy
- **Building** a technology maturity assessment adapted from a Gartner IT Score framework across 4 workstreams, translating findings into an executive-facing deck used to prioritize IT investment
- **Drafting** a data closeout and destruction SOP aligned to NIST SP 800-88 and supporting SOC 2 compliance tracking, standardizing governance practices across the operations team

Data Science Institute, University of Chicago

Chicago, USA

Summer Research Assistant, AI for Climate Action

Jul 2026 – Present

- **Applying** AI/ML methods to climate modeling, translating physical climate research into economic and decision-relevant outputs

J-PAL South Asia

Multiple locations, India

Senior Research Associate

Apr 2022 – Aug 2025

- **Led** a groundwater policy analysis for the Government of Punjab, structuring the problem, running the quantitative analysis, and presenting a policy memo that directly informed state-level irrigation policy
- **Modeled** market-based incentive structures for agricultural energy use in Telangana, leading to a 10% production-cost reduction and 30% emissions decrease across 6 districts
- **Built** predictive spatial models processing satellite imagery across 200+ sites to map flood risk and resource stress; automated the pipeline, cutting analysis time 40% and informing decisions affecting 500,000+ residents
- **Orchestrated** the rollout of cold-storage infrastructure in Odisha, cutting post-harvest losses 20% and boosting trade value 15% for 500K+ farmers, coordinating with government and private-sector stakeholders
- **Managed** a team of 5 Associates and prepared quantitative analyses underpinning 10+ grant proposals totaling \$600K+, synthesizing technical findings for non-technical, senior stakeholders across government, academia, and NGOs in India

Grassroots Research & Advocacy Movement (GRAAM)

New Delhi, India

Research Associate

Jan 2021 – Mar 2022

- **Built** a performance measurement framework for grassroots health service delivery in Gujarat, using logit models on Python-cleaned datasets to guide policy prioritization for state health officials
- **Delivered** capacity-building workshops on quantitative analysis for 300+ government and think-tank stakeholders across Gujarat and Jharkhand, improving data-driven decision-making and operational efficiency by 25%

LEADERSHIP & INVOLVEMENT

- **Fellowship**, Clean Energy Leadership Institute (CELI); focused on clean energy development and cross-sector network building
- **Senior Associate, J-PAL South Asia:** Mentored 5 Associates from varied academic and professional backgrounds on project execution and technical skill-building; coordinated logistics and vendor relations for training events reaching 200+ government and civil-society participants

SKILLS

- Data & Analysis: Stata, Python, R, Excel, QGIS
- Visualization & Communication: Tableau, PowerBI, Smartsheets, PowerPoint, R (ggplot2), LaTeX
